Its a good funny game except for one flaw, minor spoilers spoiler: The last "boss" is the super sythesis fish. the healthbar system just doesnt work here. its fine on enemies who dont have (what seems to me) as a few million health, but on this thing. there is no feasible way to tell how low its health is. you can have obliterated its tail, covered it in plasma cannons from a firing squad of sardines. And then 20 minutes later after blasting it more ITS STILL ALIVE.. Best fish person shooting game I've ever play.. I made aout of ships 10/10. im scared of fish right now. Sea cucumber.. Odell Lake 3D. w/ LSD.
